

Capabilities Statement

Anthony Awtrey, CTO

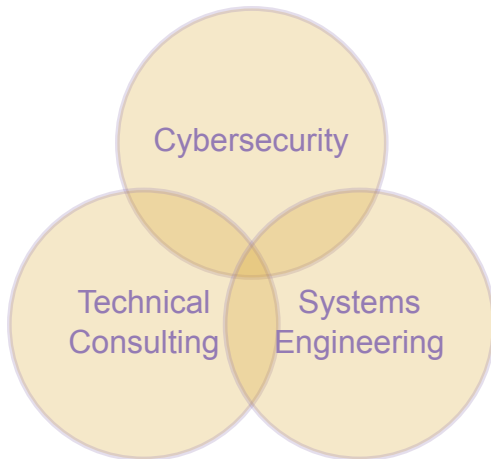

CISSP, CyberAB CMMC Registered Practitioner
25 years working in IT and systems engineering
tony@h3tllc.com • 407-437-1658 • h3tllc.com

Mission Statement

Our mission is to help identify and resolve the most challenging technical problems facing government agencies, contractors, and information technology departments.

Core Competencies

Cybersecurity - Businesses depend on confidentiality, integrity, and availability. Without adequate cybersecurity, any business risks being the next object lesson in the news.

Technical Consulting - Technology continues to change and evolve at an ever-increasing pace. Having a partner help identify solutions to your specific problems can transform your business.

Systems Engineering - Proper systems engineering encompasses all aspects of requirements development, process design, and implementation to meet customer expectations.

Systems engineering doesn't solve technical problems, it solves process problems in a systematic way.

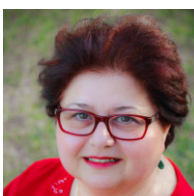

Unique Experience

While CTO of IDEAL Technology Corporation, Anthony developed a **SBIR funded digital forensics system** and brought it to market with his business partners.

Performed a complete **technology refresh** for a **1500-member church campus** including upgrades to the fiber optic, Ethernet, and WiFi networks for employees and guests.

Deployed and managed **cloud infrastructure application** using **OpenStack cloud computing** infrastructure for the **Space Launch Delta 45th Civil Engineering** squadron.

Our Founder

Hala Awtrey established H3T, LLC as a woman owned small business in 2015. She has a degree in accounting and business management and has started multiple successful businesses.

Key Differentiators

Troubleshooting - We specialize in identifying core issues, not just symptoms, and can resolve problems that others often miss.

Unique Capabilities - Our team has experience bringing products to market, creating custom software, deploying IT infrastructure, and securing systems and networks.

Solutions Focused - Rather than sell you products that don't meet your needs, we focus on defining requirements to measure the success of a solution. Then we work toward the goal of creating solutions that actually work for you.

Company Data

- DUNS: 080169653
- Certs: WOSB, WBE
- NAICS: 541512
- CAGE Code: 03W26
- Accepts credit cards and purchase orders
